

# DESCRIPTION:

# Monitor NMM-2

Weatherproof monitor, built on LCD technology and LED backlight.

Designed for all-year / all-weather outdoor use. No need for roofed firing positions.

- The monitor is based on a chassis made of stainless steel.
- The display is readable in bright sunlight, and is protected by a laminated, anti-reflective coated glass, able to withstand the impact of cartridges from automatic weapons.
- Solid MIL. spec. connectors and vandal proof buttons.
- A smart card reader for access control is standard.
- The stand, made from stainless steel, makes the monitor easily moveable, and simple to adjust to the optimum viewing position.
- The monitor is easy to operate, with dynamic menus.

The Kongsberg MPX system has been around for decades, and more than 14 000 targets have been delivered. The system has continuously been updated and improved; and is today a modern electronic target system.

The system is robust and reliable and has proven its quality with hundreds of millions of shots fired on it.

## RECOMMENDED USE:

To be used with KONBGSBERG Target Systems MPX system.

## TECHNICAL:

### Dimensions:

LCD.....	10.4"
Width including tightening wheels .....	385 mm
Height without stand .....	285 mm
Max depth.....	148 mm
Min depth .....	66 mm
Max height, unit in stand .....	440 mm
Weight with stand.....	5.5 Kg
Weight excluding stand.....	4.6 Kg
Temperature range, use.....	- 40° C to + 70° C
Power consumption.....	Max 25W
